

Avon Reading River- Autumn

Beegu by Alexis Deacon will support our continuous exploration of the importance of kindness and helping others.

Reading for pleasure and sharing time, as always, remains a key focus this year in Avon class. The children will enjoy laughing together about Rabbit & Bear in *Rabbit's Bad Habits*.

Linking with our science learning about Animals including humans, we will enjoy the highly entertaining and classic *Owl Babies*.

As a class, we will delve into the non-fiction text *The Frozen Worlds*. This links to our Learning Journey this term about hot and cold climates, and the famous explorer Edward Wilson.

As part of Black History Month, we will share the inspiring stories about *Bold Women in Black History* in this book.

As part of our sentence composition, we will enjoy *The Big Journey* by Michael Rosen. This text also links to our Science topic on Animals including humans.

Sammy Feels Shy will support the children's understanding of our PSHE topic My healthy self: How can we look after our emotions? This will also inspire our writing to inform.

Written by Ella Bailey as part of the *One Day on our Blue Planet* series, the children will immerse themselves in this picture book about an adventurous Adélie penguin chick as she sets out into the vast Antarctic ocean. This links to our Learning Journey this term about hot and cold climates, and the famous explorer Edward Wilson.

As part of our discussion on the environment and climate change, we will support our learning with *How to Help a Hedgehog and Protect a Polar Bear*. The children will be encouraged to consider positive ways they can help others and the planet.

Oliver Jeffers' *Lost and Found* will further support our learning about Antarctica and the oceans of the world.

These books inspire our writing.
